AT-Comb

NEW

ACTIVE TRANSFER COMB

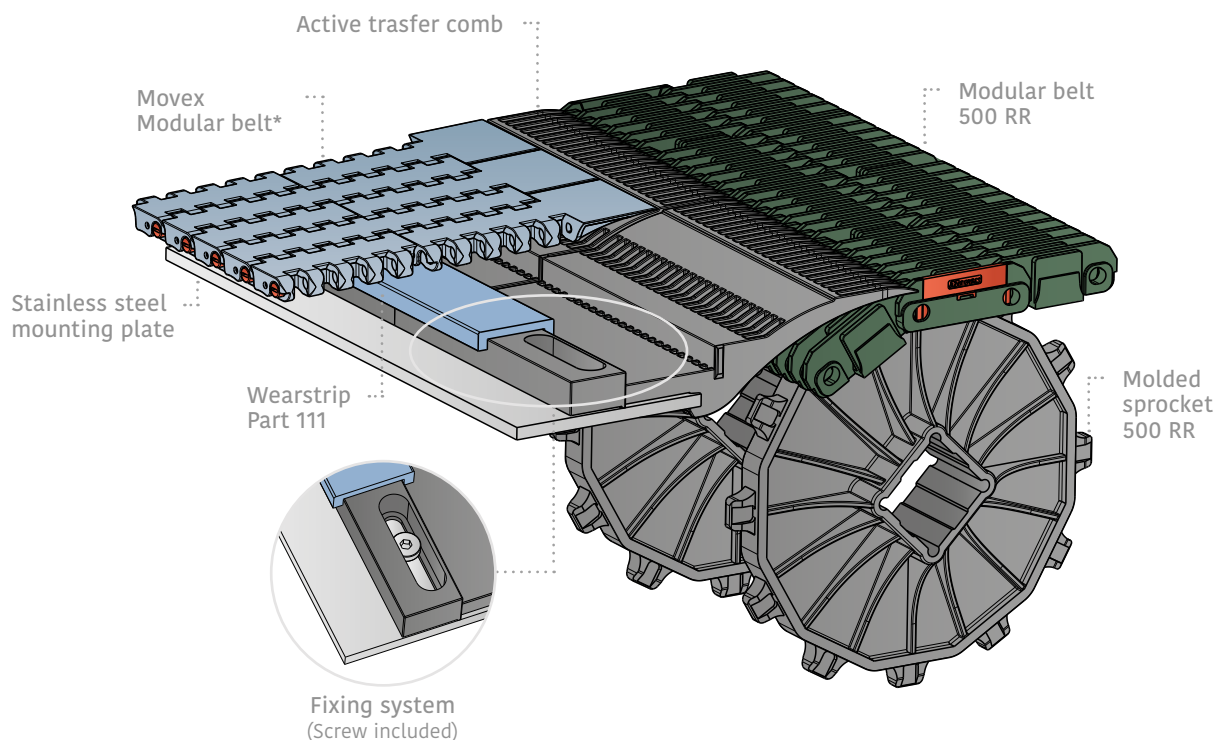

The new solution made to get a smooth transfer with raised rib belt.

Ideal for cans, PET bottles and glass bottles in pasteurizer, warmer or cooler conveyors, the **Movex AT-Comb** (Active Transfer Comb), is ideal to optimize the product transfer stability, guaranteeing a smoother transfer, so product tipping is avoided.

The shape of the ribs is optimized to perfectly fit with the Raiser Rib pasteurizer belts, guaranteeing high strength and longer wear life; moreover, the combination of the **AT-Comb** with the Movex half inch thickness belts (modular belts or chain-belt) and BluLub wear strip part 111, offer the best solution.

The **AT-Comb**, in combination with the Movex 551 FTT (version equipped with transfer wing), avoid the use of traditional dead plates, reduce the load at infeed/outfeed conveyor areas, offer a better accumulation stability over the entire conveyor and, at the end, improve the efficiency of the line.

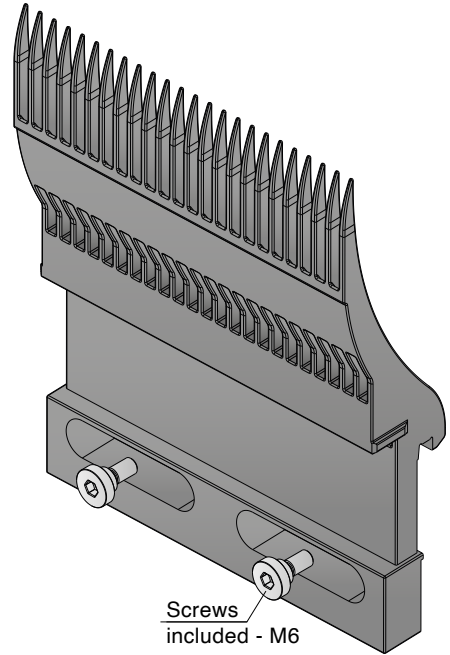

* AT-Comb can be used with any of Movex 551 FTT or 551 FTT K85 or in combination with any of 0.5in height belts/chains like 552/261/600/556 series
