# SS Pins MODULAR BELTS

## *An invisible upgrade, with powerful results.*

*At Movex, we believe that even the smallest technical improvements can make a big difference on the line. That's why we're now offering our Modular Belts with steel pins, a simple yet impactful evolution designed to increase strength and reliability without changing what makes our belts so efficient.*

*This upgrade enhances durability in demanding applications without adding unnecessary weight. We've increased the Maximum Working Load (MWL) while keeping the overall belt weight unchanged. Thanks to the superior mechanical properties of the steel pin, the belt shows reduced elongation over time, ensuring greater dimensional stability and longer service life.*

*The result? Higher mechanical resistance and improved structural stability. Steel pins deliver enhanced performance with no changes required to your existing setup.*

### **High load capacity**

*Engineered to withstand demanding applications with high working loads.*

### **Exceptional durability**

*Built for long-term performance in harsh industrial environments.*

### **Lower elongation**

*Enhanced dimensional stability under sustained working loads.*

### **Smart design compatibility**

*Fits belts with plastic pins for easy replacement.*

### **Material versatility**

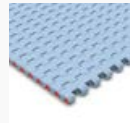

*Compatible with all standard Movex materials, depending on stock availability.*

All standard Movex materials are available, [subject to warehouse stock.](#)

A wide range of modular belt types and surface configurations is also available to meet specific application requirements. For further details and tailored solutions, please contact your sales representative.

**Minimum Order Quantities (MOQs) may apply; pricing is subject to change, sometimes substantially, depending on the modular belt type and order quantity.**

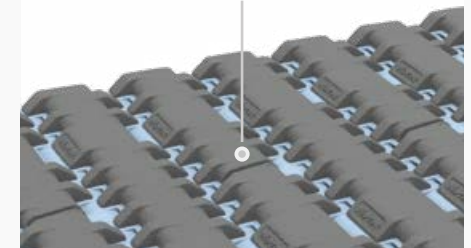

### ✓ Simple

Easy to insert and release, even when it's already installed.

### ✓ Safety system

Once inserted, the pin is secured by the Pin Sphere or the Clip-in system, and can only be removed when necessary.

**+10%** Max working load (for all products)
